Interactive comment

Interactive comment on "Simple Scaling of extreme precipitation in North America" by Silvia Innocenti et al.

Silvia Innocenti et al.

silvia.innocenti@ete.inrs.ca

Received and published: 28 January 2017

Dear Reviewer.

Thank you or your useful revision and remarks. Please find enclosed the reply to your interactive comment on the manuscript "Simple Scaling of Extreme Precipitation in North America" published in HESS-D.

Following HESS-D directives, the Authors' responses is attached as a supplement to this comment in pdf format. In this pdf, we provide a detailed response to each of your comments (which are reported in blue) and a copy of the revised manuscript in "track

Discussion paper

changes" mode in which specific colors are used to link corrections and reviewers' comments. More specifically, in the "track changes" manuscript,

- blue^{R1} is used to underline changes related to your comments,
- while red^{R2} is used for changes related to the second referee's comments [see the HESS interactive discussion web-page],
- and green is used for other changes.

Line numbering (in **bold**) refers to the revised manuscript with "track changes" attached to this reply.

Sincerely,

Silvia Innocenti, on behalf of the co-authors.
