Received and published: 10 December 2016

I consider this paper as very interesting

At page 2, lines 23-24, where there is written "Theoretical and physical evidence of the scaling properties of precipitation intensity over a wide range of durations has been provided by several studies.", authors could add the following paper as a reference:

De Luca, D.L. (2014). Analysis and modelling of rainfall fields at different resolutions in southern Italy. *Hydrological Sciences Journal*, 59 (8), pp. 1536-1558. DOI: 10.1080/02626667.2014.926013

Best Regards
