Received and published: 2 May 2017

We are thankful to the two anonymous referees who have thoroughly read and reviewed our work. Both referees find our results interesting and think that the paper should be published after considering their comments and addressing the concerns they have raised. Our response to all the comments given by the referees are already uploaded (please refer to our response to each referee). All concerns have been addressed and most of the suggestions have been incorporated in the revised manuscript which is attached as a supplement to this comment. We thank both referees for providing constructive comments which led to substantial improvements in the revised manuscript.
