I have uploaded the revised manuscript, showing all the responses to both reviewer comments in track changes.

A small note: when I first submitted the manuscript, the Editor requested some changes, which I made. It seems that reviewer 1 had access to the first version of the manuscript, while reviewer 2 reviewed the updated version in which I had incorporated the Editor’s suggestions.

The manuscript uploaded here is a modified version of my second submission, and deals with all issues raised by both reviewers.

Please also note the supplement to this comment:
