Dear Dr. Shukla,

Thank you for the careful assessment of our manuscript. We have made changes according to your suggestions:

1). We have rearranged the panels for most of the figures to make everything more visible. As you suggested, we moved the legend outside of the figure boundary and increased the size of for labels and markers.

2) We have changed the labels, which are consistent with the names in Table 1.

3) The statement "its superior performance is curious" has been replaced with "its superior performance needs further investigation".

We appreciate your help with our manuscript. Happy holiday!

Sincerely,

Liang Chen
