We thank the referee for his/her constructive comments.

Regarding the training and validation periods, the referee is completely right that the best approach is to perform the evaluation in a different period with respect to the training. That's exactly what we did. The period cited by the referee (June 2010-June 2012) is the period used for the training. As stated in section 4 of the manuscript the evaluation was done in 2015. Taking into account the referee comment, we reckon that we should stress this a bit more in a corrected version of the manuscript, maybe in section 2 or even in the abstract.

C1

Thanks for the English editing and typos corrections.
