Received and published: 28 July 2017

Dear authors,

Three reviewers all gave constructive and essentially positive reviews with suggestions and recommendations that seem to be manageable. From the replies to the reviews it is clear that you too do not see any major road blocks.

I therefore kindly request you to revise the paper according to the suggestions offered by the reviewers, clarify those parts of the text that created some confusion, and clean up the typos.

C1

I will probably ask at least one of the reviewers to go over your revision.

Yours sincerely,

Gerrit de Rooij
