We appreciate the positive feedback from the reviewer. We will cite the paper (Rios Gaona et al., 2016) to provide an example of recent study on the GPM IMERG (P2, Line 15), and also to support our discussion on the effect of gauge adjustment (P9, Line 4). Thank you for suggesting the paper. Regarding the hydrological evaluation, some runoff modeling studies with IMERG have been done in the U.S., China, and actually other locations around the globe, but, we agree that this would be a worthy endeavor for Austrian catchments.
