Interactive comment on "Development of a monthly to seasonal forecast framework tailored to inland waterway transport in Central Europe" *by* Dennis Meißner et al.

M.C. Demirel

mecudem@yahoo.com

Received and published: 1 June 2017

I enjoyed reading the paper by Meißner et al. 2017.

The literature review would be more complete if the authors would cover Dutch/German contributions/projects to low flows in the River Rhine more explicitly. SOSRhine project is only one of them: http://sosrhine.euporias.eu/en, http://meetingorganizer.copernicus.org/EMS2016/EMS2016-384.pdf There have been Dr. ir Cornelis Lely projects in the similar line/topic too. Searching the keywords "seasonal low flows forecasts rhine" will reveal other relevant contributions in HESS-2015 in particular.
