Interactive comment on "Performance of bias correction schemes for CMORPH rainfall estimates in the Zambezi River Basin" *by* Webster Gumindoga et al.

H.L. Cloke (Editor)

h.l.cloke@reading.ac.uk

Received and published: 8 December 2017

The referees agree on the value of this work but have noted several aspects of the manuscript which need fuller explanations and considerations, for example the methods for assessing performance. I look forward to receiving the author responses to these issues. I would like to highlight the necessity to really emphasise the applicability of these new findings to other locations and cases and the limitations and further work required, as I think this could be further discussed in the work.
