

Interactive comment on “Spatio-temporal trends in observed and downscaled precipitation over Ganga Basin” by Himanshu Arora et al.

Anonymous Referee #1

Received and published: 19 July 2017

Following are my comments that should be answered before this paper is acceptable for publication (1) You mention downscaling of precipitation but there is no text devoted to this subject (2) There is a trend (slope) of the precipitation but I do not see any line plots that show this trend. A trend line would highlight the increase or decrease (3) All statistics should be accompanied with p-value and significance (4) Spatial statistics (standard deviation) should be included in the paper
