The authors also would like to thank Reviewer #2 for its helpful comments . As stated to Reviewer #1, we won't be able to address all the points within the time of the review and, after an initial submission of this paper, the editor advised us to propose it in "cutting-edge case study" section. All the data of this paper are available on simple request and are planned to be uploaded in the Hymex database. A correction of the paper by a native speaker cannot be achieved in the allotted time. We agree that the bibliography part could be improved. Thank you for the references you provided. The

C1

paper will be withdrawn.
