Received and published: 22 November 2017

Thank you for your useful comments. I think that your comments and suggestions will improve the paper. However, I am not sure what part of the manuscript all of the comments refer to because when I download the manuscript, the line numbers do not match up with the line numbers you refer to. For example, the downloaded manuscript only has 155 lines to the start of the Reference section but you refer to "lines 174-175 and 200-201. Please include some of the sentence that you are referring to with the line numbers, in particular:

1) What sentence is being referred to in "Lines 32 and 33"?

2) What sentence is "line 104" referring to?

3) I think that "line 174-175" refers to the sentence starting out with "The sediment concentration at which false low turbidity....". Please verify this.

4) What sentence is being referred to in "Lines 200-201"?

Thanks for your time and effort in writing your useful review and I look forward to hearing from you.

Nick
