Interactive comment on "A classification algorithm for selective dynamical downscaling of precipitation extremes" *by* Edmund P. Meredith et al.

Edmund P. Meredith et al.

edmund.meredith@met.fu-berlin.de

We would like to thank both reviewers for the time and effort they put into reviewing our manuscript. This is most appreciated. Both Reviewers have raised a number of important points which we agree will improve the manuscript. We agree with almost all suggestions and will implement them in the revised version. Please find detailed responses to all comments in the enclosed supplement.

Best wishes,

Edmund (on behalf of the co-authors).

C1
