Hey guys, we actually did this study back in 2012, presented at AGU in a session chaired by Martha Anderson, but we never ended up publishing it. No worries though—we snooze we lose! But, it would be nice if you wouldn't mind citing that presentation? It was led by a high-school student, so I think she'd be thrilled to be cited.

Palmer, C., Fisher, J.B., Mallick, K., Lee, J., 2012. The potential of potential evapotranspiration. American Geophysical Union, San Francisco, California, USA.

Also, we could send you our results and draft paper thus far, and you could draw inspiration and/or take whatever you want from it to help your paper out. We have a few other ways of looking at it. If so, you could add her as a co-author and make her

C1

decade :)
