

Interactive comment on “Testing an optimality-based model of rooting zone water storage capacity in temperate forests” by Matthias J. R. Speich et al.

Matthias J. R. Speich et al.

matthias.speich@wsl.ch

Received and published: 28 February 2018

In the first two author comments, we addressed the general comments of the two reviewers. In this final comment, we now address the specific comments. Please find our response as a supplement.

We also take this opportunity to point out that the article referred to as "Speich et al. (in prep)", which describes a sensitivity analysis of the water balance model FORHYCS (also mentioned in the first two author comments), is now available online at Environmental Modelling and Software (<https://www.sciencedirect.com/science/article/pii/S1364815217305170>).
