Dear Muhammad Sohail Afzal,

thank you for your response. Your future plans for setting up the real-time system, including the connection to agriculture, sounds very promising. But I guess there are still technical challenges to solve which are not part of the current manuscript. Hence, I still think that the term "real time" in the title is misleading. The details about your proposed system that you provided in your response, seem to give a great outlook,

though. It will certainly be very interesting to hear from your real-time system in the future.

Best regards, Christian Chwala
