Received and published: 28 February 2018

I thank the authors for their detailed responses to the reviewers. It seems like a reasonable response to me, but hopefully one or more of the reviewers will respond with additional comments or suggestions. While we await this feedback, I will also go over these issues and will make my recommendation about how to proceed. Please go ahead with your plans to revise the manuscript even while you wait for feedback from the reviewers and myself.
