

Interactive comment on “ENSO-triggered floods in South America: correlation between maximum monthly discharges during strong events” by Federico Ignacio Isla

F. I Isla

fisla@mdp.edu.ar

Received and published: 4 June 2018

1. An introduction to the ENSOs origins and their recurrence was added, as requested.
2. Dr. Uijlenhoet requests: a. An explanation about the quality of the data was added.
b. At the same time, the probable physical causes of the correlation of the maximum monthly discharges were discussed.

Figures were corrected and the suggestions of Dr. Uijlenhoet were all accepted.

A new version (ENSO in SA 9.pdf) was attached with many corrections (for example, the Bolivian web page for hydrological data was introduced) and the discussion was

C1

improved
