Interactive comment on "Technical Note: Deciphering the Hydrologic Response of Riverbeds across Changes in Recharge with Electrical Resistivity Imaging" by Weston J. Koehn et al.

Anonymous Referee #3

Received and published: 22 May 2018

I have prepared a concise review which you can find in attachment (annotated PDF).

Overall, it is an interesting paper and topic but it lacks a proper presentation of the data (ERI) and methodology (inversion, model quality, ground-truth validation) in order to be published. I would therefore recommend moderate to major revisions.
