Received and published: 10 September 2018

We thank Anonymous Referee #1 for her/his positive comments about our opinion paper, and for providing useful and constructive comments.

We will carefully revise our manuscript and address all the points raised by the Referee. More specifically, we will improve the identification of research questions as suggested by the Referee (point number 1), and make our examples more explicit (point number 2). We will also make a better link between the text and Figure 1, to clarify the Dutch example.

We also thank the Referee for providing technical corrections. We will consider all of them while revising our manuscript. In particular, the quoted reference to “two examples” in the abstract was a typo. It should have been “the examples”.
