1395 Table S2 Sampling sites for groundwater quality and groundwater level. The abbreviation in the ID refers to the corresponding catchment. The subscripts Gs = shallow groundwater and Gd = deep groundwater give additional information on the respective groundwater layer. All groundwater wells are inside the Quillow catchment.
 N: number of samples.

Table S3 Measurement details of the analysed variables. Before the data analysis NH_4^+ was calculated from $\text{NH}_4\text{-N}$, PO_4^{3-} from o- $\text{PO}_4\text{-P}$, and the concentration of HCO_3^- was converted from mmolL^{-1} to mgL^{-1} .
