Dear Davide Zoccatelli,

Thanks again for your constructive review. In the attachment, we have responded in detail to the main comments of your review. We have summarized the comments into three topics: comments about the metric, comments about the validation and other comments. We have included some new/updated figures and tables, which we feel like would be a valuable addition to the manuscript. It would be greatly appreciated if you could evaluate whether these additions clarify the comments from your review.

C1

With best regards,

Joost Buitink, on behalf of all authors
