saturated discharge and aquifer compressibility” by Liang, X., H. Zhan, Y. K. Zhang, and K. Schilling (2017). *Water Resources Research*, 54, 3217–3219. https://doi.org/10.1002/2017WR022085

address many of the issues discussed in this paper, and thus these advancements really need to be part of this contribution. Frankly, the objectives of the paper which reads as “it seems like more research could be useful” is far from compelling. Please bring the paper up-to-date, and define a specific and achievable objective for the work. As it stands, this should not be published.
