

Review (revision 2): Caffeine vs Carbamazepine as indicators for wastewater pollution in a karst aquifer

November 10, 2018

The authors addressed all of my remarks and I recommend publication. The manuscript is short and concise and reads very well. Please see below for some minor remarks/corrections. In case this is not part of the technical editing of the journal, I would recommend to replace blanks between values and units by thin spaces, e.g. 10 m instead of 10 m.

Typographic corrections:

1. (Fig1): either remove the term "Legend" or slightly move it to the right.
2. (p3, line 8): The sentence seems to miss a word: "... from the dam downstream may occur"?
3. (p5, line 5): °C
4. (p6, line 14): "... while a zero concentration gradient..."
5. (p6, line 19): "... incorporate a/the 1D Richards' equation..."
6. (p8, line 7): t_j ? ... j as subscript.
7. (p8, line 12): "... to the calibrated model RMSE"?
8. (p10, line 28): 0.014-0.07 d⁻¹ ?
9. (p15, line 9): "... performed ..."
