The shape of the basins as presented in Figure 2 and 3 deviate significantly from the shape as presented in Figure 1. Please consider re-scaling.

Reply to the editor's comments:

First, thank you very much for the further review by the editor and referees. Below are the individual responses to the editor's and reviewers' comments.

Because the proportions of the Figures 1,2 and 3 are different, and the shape of the basins as presented in Figure 2 and 3 are different from that in Figure 1. So we re-scale Figure 1 and 3 to make sure the three Figures look the same in the revision paper.
