Thank you for the positive feedback.

We will add the reference to the Esperanto article. (Makkink, G.F. (1957). Ekzameno de la formula de Penman. Neth. J. Agric. Sci. 5. 290-305.) It is interesting to realize that even though I never studied Esperanto any further than "Mi estas Bart" it is still readable for me. Indeed it is fitting to cite at least one Esperanto article in a study supported by the EU. (And it is also the most accurate reference according to (McMahon, Thomas & Malano, Hector & Schultz, B. (2015). Comment on the Reference to Makkink Potential Evaporation Equation. Journal of Irrigation and Drainage Engineering. 141.

C1

02514001. 10.1061/(ASCE)IR.1943-4774.0000845.)

Of course the typo will also be corrected.

Kind regards,

Bart van Osnabrugge
