of extreme events in the earthH2Observe project”
by Toby R. Marthews et al.***

Toby R. Marthews et al.

tobmar@ceh.ac.uk

Received and published: 14 March 2019

The reviewer stated: "8. P6L10 " $\alpha_{X,j} < -1$ ", I believe you mean $\log(\alpha_{X,j})$."

I responded that the statement at P6L10 was correct as stated, however I need to apologise for that (!): actually the reviewer was 100% correct on this point. I have to admit I got my log values confused at this point and didn't even realise it when I initially read this reviewer comment. I retract completely: the statement was not correct: the reviewer was! The text has now been amended to " $\alpha_{X,j} < 0.1$, $\log_{10}(\alpha_{X,j}) < -1$ ".

Best, Toby M
