Received and published: 24 July 2019

I have added a combined pdf with the 3 responses to reviews as it was required in the "final response", but I encourage to use the responses posted here as author comments since they are easier to handle. We have produced the manuscript using online latex, therefore we do not have a tracked version in pdf comparing the original and final versions. The changes introduced are very clearly stated though, with quotes of the revised texts, in the author responses to reviews.

Thanks
