Interactive comment on "Global re-analysis datasets to improve hydrological assessment and snow water equivalent estimation in a Sub-Arctic watershed" *by* David R. Casson et al.

Anonymous Referee #1

Received and published: 29 May 2018

The copernicus portal kept on logging me out, therefore I have to attach my comments in form of a pdf. see below

Generally the manuscript is well written and correctly presented. The methods are suitable for the analysis and the study seems original. I suggest only minor additions and technical corrections.

Please also note the supplement to this comment:
