

Interactive comment on “Revisiting extreme precipitation amounts over southern South America and implications for the Patagonian Icefields” by Tobias Sauter

Bettina Schaepli (Editor)

bettina.schaepli@giub.unibe.ch

Received and published: 13 September 2019

Both reviewers agree that this manuscript is an important contribution but that it requires some methodological clarifications and improvement of the presentation of the results and discussion. I invite the author to answer these methodological and content / structure comments here in the public discussion before preparing the revised version.
