

Interactive comment on “A framework for deriving drought indicators from GRACE” by Helena Gerdener et al.

Helena Gerdener et al.

gerdener@geod.uni-bonn.de

Received and published: 4 October 2019

We thank the editor Bettina Schaefli for the opportunity to answer the reviewers comments and we also thank the reviewers for the very helpful comments they provided. These comments certainly helped us to improve the manuscript and we are very grateful that our paper attracted interest. We addressed the reviewers comments in our author comments. The reviewer’s comments were answered in the proposed way: Referee comment, author’s answer, and changes in the manuscript. Red color indicates our answers towards the referee comments and, if necessary, the old sentence/text to what the comment refers. Green color indicates the new changes in the text. We hope that we could adequately address all considered aspects.
