

Reviewer Comments: hess-2019-281

The authors have addressed the comments in the manuscript. I believe the presentation quality of the work (figures, tables, information structure) has improved. They have also worked a bit on improving the discussion section which was important. Accepted subject to technical (remaining) corrections.

Technical Corrections:

Line 75: The reference is not listed in Bibliography

Line 143-144: "For detailed principles and applications of STL, readers are encouraged to refer to Cleveland et al. (1990) and Bergmann et al. (2012)."

Previous comment 34: Not yet addressed in the manuscript.
