Response to the Editor for the Manuscript Entitled "Comparison of probabilistic post-processing approaches for improving NWP-based daily and weekly reference evapotranspiration forecasts"

By Hanoi Medina, Di Tian

January 29, 2020

We would like to thank the editor for the interest in our paper. We have conducted the following minor corrections: 1) Made the data and scripts/tools available in a FAIR-aligned public data repositories with a digital object identifiers; 2) changed the Code/Data availability statement; 3) and corrected a spelling error (changed dicussing to discussing).
