July 21, 2020

To the Editor Roberto Greco and the referees, we hope this letter finds you well and healthy,

On behalf of all authors, I would like to thank the Editor and the Referees for the dedication and work you have dispensed.

We are glad we met the requirements for the Hydrology and Earth System Sciences and excited to have our work published. The referees' comments were essential for the final state of our paper. For this, we are thankful.

Finally, we would like to thank you for the valuable work of editing and revising works, a task sometimes foreseen, although decisive in producing science.

We look forward for future interactions

Sincerely,

Pedro Alencar
