Dear Anonymous Referee #1,

Re: Manuscript # HESS-2019-544 entitled "Dynamics of hydrological model parameters: mechanisms, problems, and solution".

Many thanks for your positive evaluation and encouragement for the results and scientific significance of this study. We greatly appreciate the Referee's comments, especially in the focus of the first goal and textural improvements. All suggestions are helpful to improve this manuscript.

We have carefully studied and considered all comments in making revision and a point-by-point response is as follows. For clarity, all comments are given in black
