

Interactive comment on “Should altitudinal gradients of temperature and precipitation inputs be inferred from key parameters in snow-hydrological models?” by Denis Ruelland

Denis Ruelland

denis.ruelland@um2.fr

Received and published: 2 April 2020

Please find an updated version of my responses to the referee comments. This updated version addresses the comments from referee #2 (received the 25th of Feb. 2020) while taking into account my reply to the comments from referee #1 which I received the 27th December 2019. Please, find my responses and modifications to manuscript in a supplement file as a detailed point-by-point reply to the referee comments. For clarification, remarks of referees are formatted in grey italic, while my answers (response and modifications to manuscript) are formatted in blue. The different modifications (text and figures) have been inserted in track changes mode in
