We thank Erik Oerter very much for this positive feedback. It is very helpful to receive this comment by one of the (so far) few groups dealing with this topic. We are grateful for this suggestion and have considered to include a section on soil CO₂ measurements. Finally, we decided to include a short paragraph but would not like to extensively touch on the soil CO₂ measurements for the sake of not further extending this manuscript.

C1

Kind regards, Matthias Beyer & Maren Dubbert
