Interactive comment on "How rainfall event characteristics affect the applicability of I_{30} as an index of intense or erosive rainfall: a brief review with proposed new rainfall index" *by* David L. Dunkerley et al.

Anonymous Referee #1

I conclude that the paper is very interesting. I consider that this kind of papers is very useful to improve knowledge about climate and soil erosion studies. Some comments (missed references, improvement of the figures, separation of discussion and conclusions, etc) were added in the attached pdf. Best regards!
