Received and published: 18 July 2020

Dear Reviewer,

We are very grateful to you for helpful comments on the manuscript. We must acknowledge that most comments are in accordance with reviewer 1 (e.g. title vs. focus of manuscript, language aspects) but also add special questions concerning exploration of land use effects, seasonal analysis and uncertainty of EC-measurements. As the immediate situation does not allow for the necessary thorough revision, we have decided to withdraw the manuscript.

C1

We thank you for your constructive review.

Yours sincerely

Uta Moderow on behalf of all Co-Authors
