

## **Final review – author responses**

**L 78: Probably „models“ not „modes“ ?**

This error has been corrected.

**Figure 6: I believe the term „Peak Frequency“ is not defined in the manuscript, which prevents interpretation of the figure. Could you add it?**

Text has been added to the image caption to clarify.

**Figure 7: Additionally to the comment by the reviewer, could you move the legend to the bottom right and increase the font size of the numbers? Currently it is difficult to read.**

This had been completed.

**Could you please carefully read the manuscript a last time. There are a couple of typos / gaps that are probably remaining from the revision procedure.**

Lead author has re-read and checked the document. These typos and gaps have been corrected.
