Dear Uwe Ehret,

Thank you very much for your review of our paper. We look forward to addressing your feedback in detail in the near future. In our preliminary scan of your comments, we noticed that the tables were missing from the manuscript just as you noted. We included these with our submission, but somehow they were missing from what is currently available on line. We have been in touch with the journal to correct this problem. I am also going to upload those tables in the main comments area of the discussion so that they will be available to all subsequent reviewers. Sorry for this issue and thanks
