Thank you for your comments. We add additional text of few pages and conclusion in manuscript. In addition, we involve new coauthor in revised manuscript. Our response is in the revised manuscript.

- the link, if any, with the International Commission on the Protection of the Danube respond ICPDR main task is protection of environment, water quality, ecology, biodiversity. We present on the official meeting of ICPDR as observer and invite secretariat of ICPDR on our meetings also. They have not so much interest on hydrology; there is connection on ICPDR web from on item “Water regime” on UNESCO IHP pages. The ICPDR has not so much interest and funding for hydrology. By the way, I was ICPDR

C1

task force member before ICPDR was established.
