Dear reviewer,

We appreciate your thorough review of the manuscript and all the constructive suggestions you provided. We will provide a complete response with a revised manuscript to address all the comments as soon as possible.

Besides, we want to make sure that we don't misinterpret the sentence. In the second paragraph of your comment, you mentioned: "I can see any important weakness in the mathematical approach and the discussion". We suppose it is a typo and the original sentence you want to write is: "I can't see any important weakness in the mathematical approach and the discussion".

Again, we are grateful for the review and will provide the complete response shortly.

Bests,
