

EDITOR

Following up on a review of the latest version of your manuscript, I consider your manuscript now receivable for publication in HESS. Prior to the final processing steps, please have a look at the figure numbering, which obviously jumps from 6 to 8 as a result of a reorganisation of the manuscript. This would have to be corrected before final acceptance of your contribution.

We thank the Editor and the Referee for their decision. The figure numbering has been revised.

REVIEWER

The current version of the manuscript has been substantially reconfigured as a technical note. The authors have also qualified some of their conclusions. While they have not gone as far as I think they should have, the manuscript is now in a state where I think the editor should just decide whether it is now suitable for the journal. (One thing that obviously must be fixed is the figure numbering, which jumps from 6 to 8.)

Thank you. The figure numbering has been fixed as suggested.
