**Table S1:** The UMD-AVHRR 14 classes (Map code) classification (on the left) was used to reclassify the 23 classes-based PROBA-V LC map. On the right side of the table the PROBA-V land uses are displayed, together with the map codes for each land use. Additionally, the number of pixels, related to each class are shown, together with the UMD-AVHRR reclassification map code.

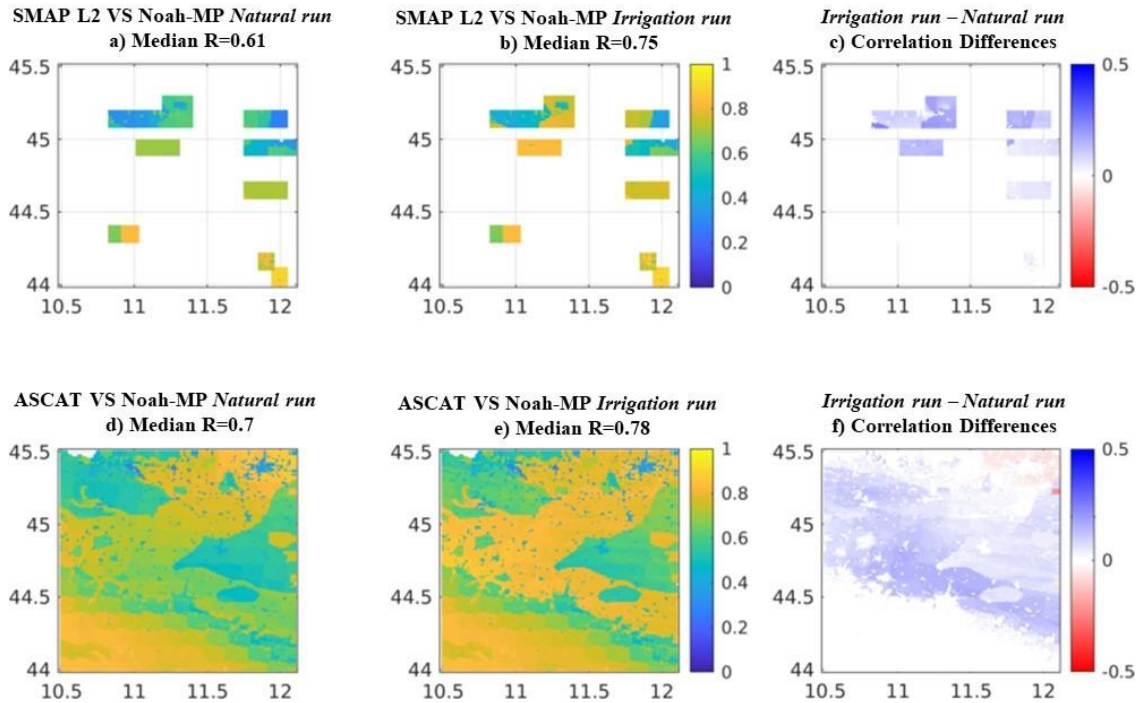

Figure S2: Maps of temporal Pearson-R between biweekly values of SSM from Noah MP: a) *Natural run* and SMAP L2; b) *Irrigation run* and SMAP L2; d) *Natural run* and ASCAT; e) *Irrigation run* and ASCAT. Maps of the Pearson-R differences display the grid-based difference between: c) map b and map a; f) map e and map d. The reference period is April 2015-December 2019.
