

## **HESS-2021-330, Revision 2, Authors' response**

Dear Zhongbo,

in addition to the changes made during the first round of revisions, we completed a thorough editing of the manuscript.

This includes increasing the font sizes in Figures 4 and 7 (labels of the other Figures were already fixed in the first round). Additionally, we fixed some small details in the text and added acknowledgements to the four reviewers and financial support for publication costs.

Changes made in the first round of revision are marked in blue, changes made during the second round are marked in orange in the track-changes version of the manuscript.

An automatically produced, detailed list of changes can be found on the last pages of the track-changes version. "r2" marks changes made during the second round.

Kind regards,

The authors
