

RESPONSE TO REVIEWERS

Review of Manuscript No.: hess-2021-352

Title: "Rainfall-runoff relationships at event scale in western Mediterranean ephemeral streams"

Authors: Roberto Serrano-Notivoli, Alberto Martínez-Salvador, Rafael García-Lorenzo, David Espín-Sánchez, and Carmelo Conesa-García

Dear editor,

Thank you for your revision. Your argument is right since there was a mistake in the calculation of the return periods. We wrongly assumed one rainfall event per year, but the actual frequency is higher for both watersheds. We recalculated the return periods with the correct frequency and now Figure 8 shows a realistic picture of rainfall events occurrence. We also changed the corresponding values of return periods in section 3.4.
