Lysimeter based evaporation and condensation dynamics in a Mediterranean ecosystem	
Handling Editor	Lixin Wang
Manuscript type	Research article
Status	Final response (HESS discussion)

Author's response to remarks from the preceding review file validation

(Referee comments in black, *author's response in blue italic*)

1. Regarding your figure E1: With the next revision, please check if a copyright statement/image credit is required and add it to the figure caption, if applicable. If you are the originator, you can just inform us.

For Figure E1, no copyright statement is required. I am the originator of this figure

2. Please ensure that the colour schemes used in your maps and charts allow readers with colour vision deficiencies to correctly interpret your findings. Please check your figures using the Coblis – Color Blindness Simulator (<https://www.color-blindness.com/coblis-color-blindness-simulator/>) and revise the colour schemes accordingly.

All Figures have been checked with the suggested Coblis - Color Blindness Simulator. We changed the color assigned to one flux (adsorption) in Fig. 2; Fig. 3; and Fig. 7 accordingly to ease the distinction between the fluxes.
