Dear Dr. Jan Seibert -

I am writing this message to respectfully ask if you could approve of making a correction in the manuscript. I found a sentence in Page 9 that should be changed during the final proofread process. During the review process, the PCA results with numbers were slightly changed but they had not been applied in this statement. Please see below.

Current: "The PCA results reveal that the larger precipitation bias is *the largest* contributor in the first PC (> **50%** of the total explained variance) to the SWE uncertainties."

This statement should be modified as below.

"The PCA results reveal that the larger precipitation bias is *a major* contributor in the first PC (> **46%** of the total explained variance) to the SWE uncertainties."

Thank you for your time and consideration.

Sincerely,
Eunsang Cho (Corresponding author)
